

## Comparison of Annualized Changes in Bone Mineral Density in Different Groups of Compliant Subjects Following the AlgaeCal Bone-Health Plan

- \*1 = Expected change in BMD without any intervention for subjects of this age and gender
- \*2 = Annualized changes in BMD when taking 1,200 mg of Calcium Carbonate with 800 IU Vitamin D3
- \*3 = Annualized changes in BMD after taking the initial AlgaeCal formula
- \*4 = Annualized changes in BMD after taking the final (and current) AlgaeCal formula
- \*5 = Annualized changes in BMD after taking the final (and current) AlgaeCal formula
- \*6 = Annualized changes in BMD from "Expected" after taking the final (and current) AlgaeCal formula
